Profile

Anjum is an MBA and SAP-certified professional with over 13 years of experience in SAP FICO and 12 years as a Financial Controller. He has led and contributed to multiple SAP projects, including four full lifecycle implementations, upgrades, support, and data migrations. Proficient in ASAP methodology, Anjum excels in gathering and mapping business requirements, configuring SAP modules, and integrating FICO with SD, MM, and CO.

He has deep expertise in areas such as Accounts Receivable, Fixed Asset Accounting, Product Costing, and FSCM, and has worked with tools like Vertex O-Series for tax calculations. His configuration skills span General Ledger, AP/AR, Asset Management, Controlling, and enterprise structure design. Anjum is also experienced in banking integration, lockbox setup, and cost object controlling.

Known for his leadership in blueprint sessions and process design, Anjum creates functional specifications, trains key users, and delivers end-user documentation. His adaptability, strong communication, and initiative make him effective both independently and in team environments.

Selected Experience

Aerospace & Defense Sector - Anjum led SAP FICO initiatives focusing on Project Systems and Integrated Asset Accounting, including AUC, depreciation, and year-end close. He configured FSCM modules (Dispute, Collections, Credit Management), Group Reporting, and Cash Management. He supported government contract billing and compliance, implemented 4-4-5 calendars, and optimized document validation procedures for ITAR-regulated environments.

Professional Services - At a Big Four firm, Anjum configured and tested FSCM Credit Management and Sabrix tax interfaces. He led integration efforts across SD and FI modules, supported Group Reporting, and improved costing processes including Activity-Based Costing and Material Ledger. He also mentored junior consultants and drove process redesign for production and purchase variances.

Professional Services & Electronics Manufacturing - Anjum managed SAP-PS configurations including WBS settlements, RA keys, and T&E integration. He led blueprint sessions for intercompany billing and RRB, supported global finance users across GL, AP, AR, and CO modules, and ensured compliance with industry standards. He also configured foreign exchange scenarios and trained end users.

Industrial Manufacturing - Anjum implemented full lifecycle S/4HANA solutions, focusing on FI, CO, and FSCM. He resolved complex ABAP-related issues, integrated tax calculations via Vertex, and led cost object controlling and production order integration. He conducted AS-IS/TO-BE analyses and managed ticket resolution and system enhancements.
