Profile

SAP MDG Consultant with 8 years of experience specializing in the design, configuration, and integration of Master Data Governance solutions for S/4HANA and ECC systems. Expertise in customizing data models, workflows, business rules, and validations for Vendor and Material master data. Skilled in data migration, cleansing, and harmonization activities, as well as developing functional specifications for complex enhancements. Strong background in integrating MDG with external systems, implementing data quality frameworks, and supporting end-to-end project lifecycles. Proven ability to deliver scalable, compliant solutions that ensure high-quality, consistent master data across global landscapes.

Roles and Responsibilities:

•Designed and configured SAP MDG for Vendor and Material Master Data in S/4HANA.

•Developed workflows, validations, and business rules for data governance and compliance.

•Managed data migration and harmonization for vendor and material records.

•Integrated MDG with S/4HANA and external systems to ensure a single source of truth.

•Created functional specs for enhancements and coordinated testing activities.

•Provided production support, training, and documentation to business users.

•Configured data models, workflows, business rules, and validations for Materials, Vendor, and Customer master data.

•Integrated SAP MDG with SAP ECC/S/4HANA and external systems to ensure consistent, governed master data.

•Developed functional specifications for custom enhancements and coordinated with ABAP developers.
